

## STAX AND SUPERSTAX CABINETS

Setting the industry standard in quality, design and service, our superior line of Stax® and SuperStax® cabinets offer space-saving benefits. And when it comes to versatility, durability and file accessibility, our cabinets are exemplary.

### Unique Modular Concept

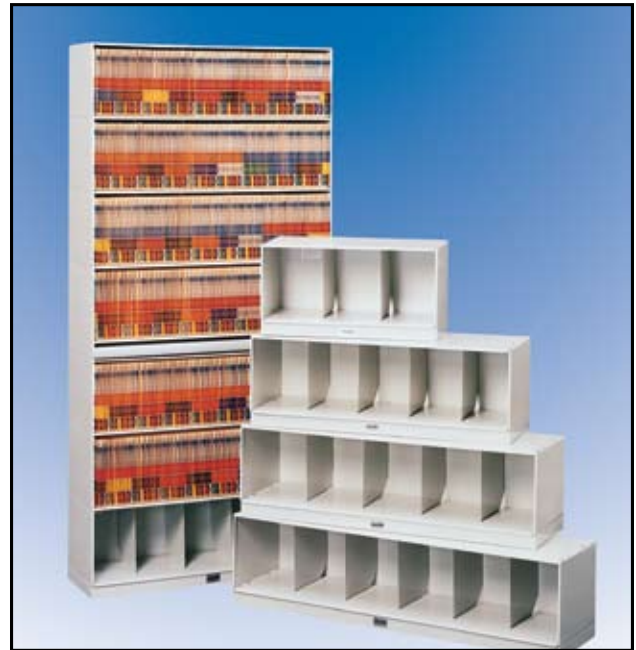

Our cabinets offer more file capacity based on our unique modular concept which allow them to be stackable for a variety of heights and additions. Assemble quickly tier-by-tier. No other equipment on the market can equal our filing capacity per square foot.

### Mixed Media Within One Cabinet

Design a cabinet to hold mixed media within the same unit. Use individual shelves to house folders, then build a cabinet to house your variety of material and reconfigure as your needs change.

### Most Space Efficient Cabinets

Space isn't wasted on posts or uprights, because each shelf is its own strong, supporting structure. When we say the full width of the cabinet is available for filing, we mean it. For example, 48" units have 48" of filing capacity.

### Benefits

*Easy to relocate – cabinets can be moved fully loaded*

*Modularity adds convenience and easy assembly*

*Space efficient with more file capacity*

*Strong, durable design with special reinforcements for vigorous use*

*Exclusive tier design provides greater access and visibility when filing or retrieving files*

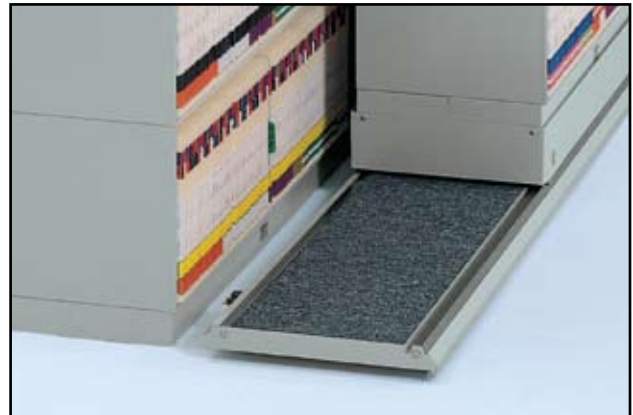

*Stackable to provide for a variety of heights*

# TAB STORAGE SYSTEMS

## Cabinets Designed for Filing

This filing cabinet was always designed to be just that – a filing cabinet. It should not be confused with less expensive, open-sided four-post equipment. Every Stax and SuperStax cabinet is closed at the back and at both sides. Its dimensions are designed to be exactly correct for all different sized file folders.

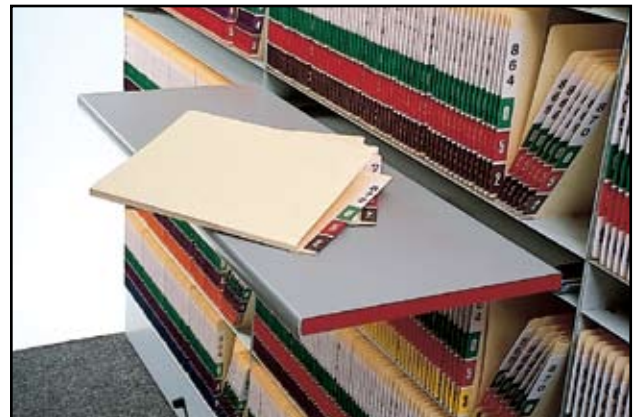

Stax is available in letter, legal, ring binder, x-ray and mini sizes. SuperStax comes in letter, ring binder, auto title and mammogram sizes.

## Specifications

- SuperStax eliminated all lips at front edges, allowing greater access to the front shelf opening entry point.
- Durable retractable workshelves available, to handle everyday use and heavy-load demands.
- Each tier is a welded heavy 18-gauge steel construction.
- Reinforcements in each corner adds strength and rigidity.
- Each shelf is assembled with with seven rivets and a steel interconnect mechanism to keep units firmly attached.
- Our C-shaped dividers are welded into place and act as a support beam in a building.
- Standard base is 2" high, and top panel is flush with the top tier, adding almost no height.
- A 4" base is available for letter size cabinets.

Our Stax and SuperStax cabinets are designed "mobile-ready", allowing them to be placed safely on our Trax lateral mobile systems.

## About TAB

As the recognized leader in the records and information management industry, we develop custom solutions that enable our clients to control, store and access critical information. We offer top quality filing systems, media storage equipment and specialists that solve complex records and information management challenges. With more than 60 years of experience, we serve clients in a variety of industries including legal, finance, healthcare, insurance, manufacturing, education and government.
