

TRAX LATERAL MOBILE SYSTEMS

Trax® lateral mobile systems offer an easy answer to more filing space. The space-saving design of our storage equipment means that you use far less of your valuable office space.

Benefit from the Space-Saving Design

Our systems can take the shape that you want for the storage space you need: Letter, legal, x-ray, mini and custom sizes.

Trax lateral mobile systems are ideal for any storage environment where space is at a premium, and in any industry.

Quickly Add Space Without Interruption

A lateral system is the most simplistic form of high density mobile storage. Only the front cabinets are movable, rolling from side-to-side, allowing access to the cabinets behind them. Easy to install in front of existing cabinets, minimizing disruption in your office.

Transform Your File Room into a Productive Work Center

We provide everything an active file room needs – space and time are valuable assets. We can help you manage both.

Benefits

Ideal for adding filing space and mobilizing existing cabinetry

Easy to move and reassemble

Quick access to files and other stored materials

Allows for seamless expansion as your filing needs grow

Increase linear filing inches with less space for high-density storage capacity

TAB STORAGE SYSTEMS

Easy to Install, Stable, and Safe

Our floor decks are perfectly level so your cabinets won't drift out of position. Each carriage is equipped with two channels that interconnect with the track and deck. These channels, along with end stops, are safety devices to prevent derailment.

Our patented anti-tip device changes in elevation as it moves up and down in relationship to the rear cabinets, offering a securely connected safety system. This also permits step-in (not step-up) access for convenience.

Specifications

- Four wheels and two tracks using 3-1/4" steel guide wheels for maximum ease of operation.
- Each wheel is equipped with dual factory-sealed ball bearings, rated to provide for weight loads of 1,325 pounds.
- Carriages made from heavy gauge aluminum extrusions and welded frame includes L-shaped containment for cabinets to nest within the frame.
- Floor decks are made with 3/4" plywood and adjusting screws with heavy steel plates placed every 12" for support.
- Rubber carriage bumpers provide a 3/4" gap between file cabinets for user safety.

Pair a Trax Lateral Mobile System with:

- Stax and SuperStax Modular Cabinets
- 4-Post Shelving

About TAB

As the recognized leader in the records and information management industry, we develop custom solutions that enable our clients to control, store and access critical information. We offer top quality filing systems, media storage equipment and specialists that solve complex records and information management challenges. With more than 60 years of experience, we serve clients in a variety of industries including legal, finance, healthcare, insurance, manufacturing, education and government.
