TAMBOUR LOCKING DOOR KITS

For 4-Post Shelving

Designed and Built to Last

The tambour door is constructed of a patented interlock system with durable flexible hinges providing superior strength, durability and long-lasting reliability. A single lock secures the cabinet. Locks may be keyed so that a single key will fit multiple doors. The door housing is constructed of furniture quality 18-gauge cold rolled sheet steel and the rails are constructed of either 18 or 20 gauge cold rolled steel. A flange across the entire unit provides a decorative look and added stability.

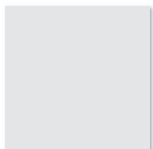

Easy to Operate

Our tambour door operates on a high quality customized counterbalance system. The counterbalance system is manufactured with metal components providing for mechanism stability and long-term reliability. Dual aluminum handles are located at the base of the unit and a built-in mid-grip handle is located approximately 28" from the floor.

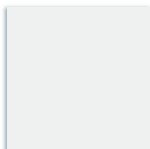

Matching Colors

Tambour doors have a textured finish in the following colors: Light Gray or Ivory. Custom colors also available.

Tambour Door Colors

Light Gray

Ivory
